EXAMINER'S COMMENT

1. This Notice of Allowance is responsive to applicant's amendment filed 2/3/2006 and 7/20/2007. The amendment and arguments filed therein has overcome the rejections of claims 1-12 and 15-24, under 35 U.S.C. 112, first paragraph mailed 4/6/2007. Therefore, the rejection of the claims have been withdrawn. Furthermore, the terminal disclaimer is also acknowledged.

REASONS FOR ALLOWANCE

2. The following is a statement of reasons for the indication of allowable subject matter:

The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest an embolic extraction catheter comprising a porous filter membrane has a length less than the length of a plurality of struts, where a vascular filter has a smaller first diameter for insertion into the lumen and a second larger diameter for expanding to substantially equal diameter of the lumen and to be placed in a sealing relationship with the lumen, where a hub permanently attaches to a proximal end of a catheter, and where the hub further comprises a sideport and means for maintaining a seal on a guidewire, where the lumen of the hub is in fluid communication with the lumen of the catheter. As to claims 14-15 and 26, the prior art does not teach the invention including, the step of slidably inserting a flexible catheter over a guidewire, where the catheter comprises a perforation in a distal portion, where a vascular filter has a smaller first diameter for insertion into the lumen and a second larger diameter for expanding to substantially equal diameter of the lumen and to be placed in a sealing relationship with the lumen, where a hub permanently attaches to a proximal end of a catheter, and where the hub further comprises a sideport and means for maintaining a seal on a guidewire.
